

UMANG PANDEY

Ghaziabad, India

+91-7518593228 umangpandey.co@gmail.com LinkedIn GitHub Portfolio

Summary

Motivated Computer Science student with solid Python programming skills and hands-on experience building data pipelines, automation scripts, and backend solutions. Proficient in Python libraries including NumPy and Pandas, and experienced with SQL databases. Passionate about applying machine learning techniques to real-world problems, as demonstrated through projects involving predictive modeling and interactive dashboards. Eager to contribute as a Python Developer intern and grow within a dynamic, real-world software development environment.

Education

NITRA Technical Campus <i>Bachelor of Technology (B.Tech) in Computer Science and Engineering</i>	08/2022 – Present <i>Ghaziabad, India</i>
MPVM Ganga Gurukulam <i>Intermediate (Science Stream)</i>	04/2020 – 03/2021 <i>Prayagraj, India</i>

Projects

HEART-IQ – Cardiac Prediction System | Python, Streamlit, Scikit-learn, Plotly 02/2026 – 05/2026

- Built an end-to-end cardiac risk prediction web app that analyzes patient clinical profiles and outputs heart disease probability scores using a pre-trained Scikit-learn ML model.
- Engineered role-based access control with SMTP/SSL OTP recovery and a print-ready report system using **CSS media print** for clean clinical PDF exports.
- Integrated interactive Plotly visualizations to help clinicians interpret risk factors and patient data trends across multiple health parameters.

Employee Performance Dashboard | Power BI, SQL Server, Excel, DAX 06/2025 – 08/2025

- Engineered an interactive Power BI dashboard by integrating data from multiple sources (Excel, SQL Server, CSV), reducing manual reporting time by **10%**.
- Designed complex DAX measures and calculated columns to derive KPIs including performance scores, attendance rates, and departmental comparisons.
- Implemented dynamic row-level security (RLS) to control data visibility based on user roles across different departments.

Technical Skills

Languages: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL, JavaScript (basic), HTML/CSS (basic)
Python Ecosystem: Data wrangling, scripting, automation, Exploratory Data Analysis (EDA), Predictive Modeling, Streamlit
Machine Learning: Supervised learning, classification, regression, model evaluation (Scikit-learn)
Databases: SQL Server, MySQL – querying, schema design, joins, data manipulation, stored procedures
Tools & Platforms: Git & GitHub, VS Code, Jupyter Notebook, Excel (advanced), Power BI, Streamlit Cloud
Soft Skills: Problem-Solving, Project Management, Team Collaboration, Analytical Thinking, Attention to Detail

Certifications

- **Data Analytics** – Oracle
- **Microsoft Azure SQL** – Microsoft
- **Crash Course on Python** – Google (Coursera)
- **Web Development (Frontend Developer)** – Infosys Springboard

Languages

English: Full Professional Proficiency
Hindi: Native Proficiency
